Lymph node

37th European Congress of Cytology
Cavtat, Croatia, 30th Sept-3rd October 2012

Nives Džeko Škugor
General Hospital Šibenik, Croatia

- In May 2011 26-year-old female patient BL presented with weight loss, night sweats and itchy lower legs.
- Because of swelling of the neck and chest pressure clinician suspected on subacute thyroiditis and started corticosteroid therapy
- In November CT scan revealed mediastinal, abdominal and neck lymphadenopathy, pleural and pericardial effusion
- Cytologic examination of the pleural fluid was done
- FNAC of the neck lymph node was performed
